DETAILED ACTION

1. This application is in condition for allowance except for the following formal matters:

Drawings

1. The drawings are objected to because figure(s) 5-8 fail(s) to have the label prior art. Correction is required.

2. The drawing(s) is(are) objected to because they fail to label (figure(s) 2, 3, and 5) what the element boxes 18, 13, and 16 are. Without some indication as to the content of the boxes (or preferably ansi symbols of the actual elements) it is not clear as to what the elements are and they are not explanatory to a reader as a quick method of determining the general background of the invention.

See MPEP 608.02 subparagraph (o) -- **Legends**

Suitable descriptive legends may be used, or may be required by the Examiner, where necessary for understanding of the drawing, subject to approval by the Office. They should contain as few words as possible.

3. Applicant(s) is(are) reminded of the proper content of an abstract of the disclosure.

The abstract should not refer to purported merits (**improving conversion efficiency**) or speculative applications of the invention and should not compare the invention with the prior art.

4. Correction is required. See MPEP § 608.01(b).

Art Unit: 2838

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

1. The following is an examiner's statement of reasons for allowance: No prior art uncovered anticipates or renders obvious applicant(s) claimed method and circuitry for a dc-dc converter having a first series circuit including two switching devices connected between a positive terminal and a negative terminal of a DC power supply that supplies a DC input voltage, a second series circuit including one or more capacitors and a primary winding of a transformer connected to one of the switching devices, switching frequency changing means for changing a switching frequency of the switching devices, and on-off ratio changing means for changing a on-off ratio of the switching devices.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Allowable Subject Matter

Art Unit: 2838

1. Claims 1-6 are allowable over the prior art of record.
